

Bohrstar 54

BORING KITS from $\varnothing 6$ mm up to 210 mm

Coupling system

HIGH RIGIDITY

By tightening the two cone shaped coupling screws, high axial forces are developed in the tapered holes of the pilot shank. These axial forces preload the contact surface between the flange faces of the coupled components with high axial pressure for ample support against lateral loads. It can also dampen vibrations.

POSITIVE TOOL ORIENTATION

The locating pin guarantees repeat positioning between components at all times.

All arbors, extensions and reducers are shipped complete with coupling screws.

Bohrstar 54 KIT

Rhombic insert
